EGLO TREND HIGHLIGHTS 2025/26

El equipo de diseño de EGLO ha vuelto a inspirarse en las mega tendencias del momento para la temporada 2025/26. El uso de formas y colores, la elección de materiales y la estética general de los nuevos productos EGLO armonizan a la perfección con las tendencias de vida contemporáneas y futuras. El minimalismo y el uso cada vez más popular de materiales y colores como el latón y los tonos tierra han tenido una influencia especial en los diseños de luminarias de esta temporada.

The EGLO design team has once again drawn on current mega-trends as a source of inspiration for the 2025/26 season. The new EGLO products use of shape and colour, choice of materials, and overall aesthetic harmonise perfectly with both contemporary and future living trends. Minimalism and the increasingly popular use of materials and colours such as brass and earth tones have had a particularly strong influence on this season's luminaire designs.

Minimalismo - La reducción consciente de formas y colores a lo esencial se refleja en nuestras luminarias. Formas claras, sencillas y colores lisos se combinan para crear una atmósfera serena de acuerdo con la máxima "menos es más". Los tonos grises, cálidos y los elementos de madera le dan a la habitación un toque acogedor, añadiendo reflejos de luz atmosféricos que ofrecen un escenario armonioso para que todo el espacio vital haga su magia sin distracciones.

Minimalism – The art of less, the conscious reduction of shapes and colours to the bare essentials, is reflected in our luminaires. Clear and simple shapes and plain colours combine to create a calm atmosphere, in keeping with the maxim "less is more". Warm grey tones and timber elements give the room a welcoming touch, adding atmospheric highlights and offering a harmonious stage for your entire living space to work its magic without any distractions.

Latón - Tan popular en los años 50's y 60's, disfruta actualmente de una nueva ola de popularidad. Combinado hábilmente con materiales en contraste, los tonos metálicos brillantes del latón aportan un toque de lujo a los espacios. Hemos incorporado este material de alta calidad en nuestros nuevos modelos de luminarias y lo hemos combinado con otros materiales diversos para crear cautivadores diseños modernos que se pueden integrar en una gran variedad de interiores, desde urbanos hasta clásicos y minimalistas.

Brass – Brass so popular back in the 50s and 60s, is currently enjoying a new wave of popularity. Skillfully paired with contrasting materials, the gleaming metallic hues of brass bring a touch of luxury to living spaces without appearing old-fashioned. We have incorporated the high- quality material into our new luminaire models and combined it with diverse other materials to create captivating modern designs that can be integrated into a variety of interiors, from urban to classical to minimalist.

Acogedores tonos tierra - La popular tendencia de volver a la naturaleza también ha supuesto un cambio significativo en el campo del diseño. En los últimos años, cada vez más personas adoptan el retorno a la naturaleza y el uso asociado de materiales naturales también ha dejado su huella en el mundo del color, anunciando el ascenso del marrón como el nuevo negro. El marrón en todas sus facetas puede combinarse con casi cualquier otro color y, gracias a sus diversos tonos terrosos, no sólo aporta naturalidad a nuestros espacios, sino que también transmite una sensación de calidez y confort.

Warm earth tones – The very popular back-to-nature trend has also brought about a significant shift in the field of design. More and more people have been embracing a return to nature in recent years and the associated use of natural materials has also left its mark on the world of colour, heralding the rise of sand as the new black. The colour sand in all its many facets can be beautifully paired with almost any other colour and, thanks to its diverse earthy tones, not only lends our living spaces a touch of naturalness, but also conveys a sense of warmth and comfort.

¿Líneas suaves, curvas juguetonas? Desde luego que no. La gama industrial está dominada por elementos duros y funcionales. Las piezas de metal en bruto se convierten en luminarias y difunden el estilo rudo de las naves industriales. El estilo industrial celebra la estética de las cosas imperfectas.

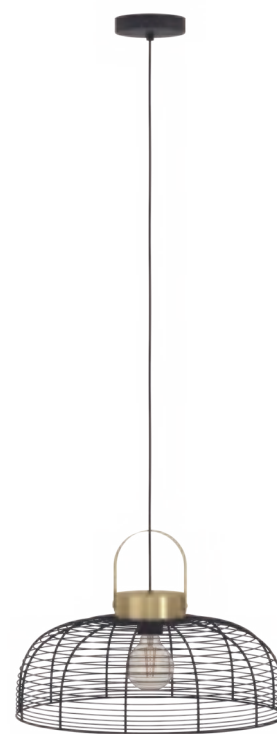

Soft lines, playful curves and comfort? Certainly not. The industrial range is dominated by hard and functional elements. Raw metal parts are turned into luminaires and spread the rough style of factory halls. The Industrial Look celebrates the aesthetic of things imperfect.

VINTAGE

#USED
#LOOK

#UTILIZA
#CONTEMPLA

¿Sabía que la palabra Vintage significaba originalmente «vendimia»? Por estilo vintage se entiende un mueble construido de nuevo pero diseñado con «aspecto usado». Por el contrario, las auténticas piezas vintage de las décadas de 1920 a 1980 pueden encontrarse en mercadillos o en el desván. Genuinas o como imitaciones: Lo vintage nos recuerda los viejos tiempos: las vacaciones de verano con los abuelos, el primer paseo en el coche de época del abuelo y la mejor tarta de manzana del molde, esmaltado de la abuela. Viaje en el tiempo y disfrute de sentimientos de nostalgia con una copa de vino. Recomendamos acompañar el vino con una degustación de nuestra gama de productos vintage.

Did you know that the word Vintage originally meant „wine harvest”? Vintage style means a piece of furniture built anew but designed in a „used look”. Genuine vintage pieces from the 1920s to 1980s can be found in flea markets or in the attic, by contrast. Genuine or as imitations: Vintage reminds us of the good old days: summer holidays with the grandparents, the first ride in grandpa’s vintage car and the best apple pie from grandma’s enamelled mould. Travel through time, and enjoy feelings of nostalgia with a glass of wine. We recommend accompanying the wine with a taste of our vintage product range.

ÍNDICE DE REPRODUCCIÓN CROMÁTICA COLOUR RENDERING INDEX

El índice de reproducción cromática Ra describe la calidad de reproducción cromática de las lámparas. Cuanto mayor sea el valor Ra, menos cambiará la luz artificial el color de un objeto. El valor Ra máximo (por ejemplo, el valor Ra del sol) es 100. Por tanto, las lámparas con un Ra superior a 90 le darán un aspecto más natural.

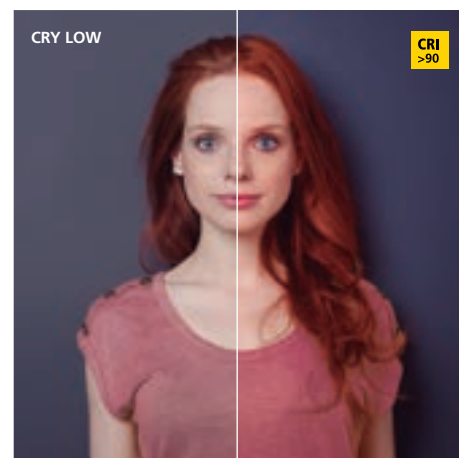

Este botón indica las lámparas que tienen un valor Ra >90.

The colour rendering index Ra describes the colour rendering quality of lamps. The higher the Ra value, the less will the artificial light change the colour of an object. The maximum Ra value (e.g. the Ra value of the sun) is 100. Therefore, lamps with an Ra above 90 will make you look more natural.

This button indicates Lamps that have an Ra value of >90.
